

Registration Authority for ISO 13616

The Society for Worldwide Interbank Financial Telecommunication SCRL, SWIFT, has been designated by the ISO Technical Management Board to act as the Registration Authority for ISO 13616.

IBAN REGISTRY

This registry provides detailed information about all ISO 13616-compliant national IBAN formats.

Release 78 – August 2017

Preface

Purpose of this document

This document shows all nationally-agreed ISO 13616 IBAN formats.

Related documentation

The following documents are referenced and can be obtained through www.ISO.org:

ISO 3166-1, Codes for the representation of names of countries and their subdivisions-Part 1: Country codes

ISO/IEC 7064, Information Technology - Security techniques - Check character systems

ISO 9362, Banking - Banking telecommunication messages- Business identifier code(BIC)

ISO 13616-1, Financial services - International bank account number (IBAN) - Part 1:Structure of the IBAN

ISO 13616-2, Financial services - International bank account number (IBAN) - Part 2: Role and responsibilities of the Registration Authority

Document conventions

The following character representations are used in this document:

n	Digits (numeric characters 0 to 9 only)
a	Upper case letters (alphabetic characters A-Z only)
c	upper and lower case alphanumeric characters (A-Z, a-z and 0-9)
e	blank space

The following length indications are used in this document:

nn!	fixed length
nn	maximum length

1 About IBAN

This chapter provides background information on the ISO 13616 IBAN standard.

1.1 General IBAN Information

What is an IBAN?

IBAN stands for International Bank Account Number. It is the ISO 13616 international standard for numbering bank accounts. In 2006, the International Organization for Standardization (ISO) designated SWIFT as the Registration Authority for ISO 13616.

Use

The IBAN facilitates the communication and processing of cross-border transactions. It allows exchanging account identification details in a machine-readable form.

1.2 The ISO 13616 IBAN Standard

Structure

The IBAN structure is defined in ISO 13616-1 and consists of a two-letter ISO 3166-1 country code, followed by two check digits and up to thirty alphanumeric characters for a BBAN (Basic Bank Account Number) which has a fixed length per country and, included within it, a bank identifier with a fixed position and a fixed length per country. The check digits are calculated based on the scheme defined in ISO/IEC 7064 (MOD97-10).

Terms and definitions

Bank identifier: The identifier that uniquely identifies the financial institution and, when appropriate, the branch of that financial institution servicing an account

In this registry, the branch identifier format is shown specifically, when present.

BBAN: basic bank account number: The identifier that uniquely identifies an individual account, at a specific financial institution, in a particular country. The BBAN includes a bank identifier of the financial institution servicing that account.

IBAN: international bank account number: The expanded version of the basic bank account number (BBAN), intended for use internationally. The IBAN uniquely identifies an individual account, at a specific financial institution, in a particular country.

Submitters

Nationally-agreed, ISO13616-compliant IBAN formats are submitted to the registration authority exclusively by the National Standards Body or the National Central Bank of the country.

2 ISO 13616-Compliant IBAN Formats

This section shows the IBAN format of each country that has implemented the IBAN standard. The countries are listed in alphabetical order by ISO 3166 country code.

2.1 AD – Andorra

Data element	Description - Pattern - Example
Name of country	Andorra
IBAN prefix country code (ISO 3166)	AD
Country code includes other countries/territories	N/A
SEPA country	No
SEPA country also includes	N/A
Domestic account number example	2030200359100100
BBAN	
BBAN structure	4!n4!n12!c
BBAN length	20
Bank identifier position within the BBAN	1-4
Bank identifier length	4!n
Branch identifier position within the BBAN	5-8
Branch identifier length	4!n
Bank identifier example	0001
Branch identifier example	2030
BBAN example	00012030200359100100
IBAN	
IBAN structure	AD2!n4!n4!n12!c
IBAN length	24
Effective date	Apr-07
IBAN electronic format example	AD1200012030200359100100
